

Dear Caregiver,

We appreciate your hard work and understand that it keeps you very busy. So busy that sometimes you may forget fundamental safety work practices. We made this safety insert especially for you so that you can refresh, learn and work safely without taking your time away from patient care.

Topic: **FIRE** Safety 

Know:

- Where fire extinguishers are kept
- What types there are
- How to use one
- Where the exits are

Always:

- Keep fire doors, exits, stairs, fire fighting equipment clear of obstructions
- Keep all flammable materials away from furnaces and other sources of ignition
- Report any fire hazards you see that are beyond your control to your HCC

Never:

- Attempt to fight a fire that puts your safety at risk

Remember: P.A.S.S

- P—pull the pin
- A—aim at the base of the fire
- S—squeeze the top handle
- S—sweep from side to side

The two leading causes of fires are electrical failure or misuse of electrical equipment. Do what you can to combat hazards by complying with regulations, obeying No Smoking signs, and properly disposing cigarettes and matches to help prevent fires. If you need more information please contact our safety specialists at safetyhasitsrewards@carewestinsurance.com.

Sincerely,
Care West Team
